SUMMARY

BS Artificial Intelligence student (6th Semester) with hands-on experience building Machine Learning, Deep Learning, and Computer Vision pipelines, and working knowledge of full-stack tools for deploying AI applications. Certified Generative AI Application Developer (NCEAC-HEC, 2026) with practical exposure to LLM-integrated systems, RAG pipelines, and agentic AI workflows. A fast learner who enjoys picking up new tools and technologies quickly, and is actively seeking an internship/entry-level role to grow while delivering real value to the team.

INTERNSHIP EXPERIENCE

Machine Learning Intern — Elevvo Pathways *Jul 2025 – Sep 2025*

- Built a CNN + MFCC audio classifier for music genre classification on 1,000+ tracks, achieving 87% accuracy across 10 genres.
- Delivered 3+ production-ready ML pipelines (cleaning, feature engineering, training) using Scikit-Learn, Pandas, NumPy — cut iteration time by ~40%.
- Presented model performance and findings to technical and non-technical stakeholders through structured reports.

TECHNICAL SKILLS

Languages

- Python, Java, C/C++
- SQL, JavaScript
- HTML/CSS

AI / ML / DL

- PyTorch, TensorFlow, Keras
- Scikit-Learn, OpenCV, NLTK
- Pandas, NumPy, Matplotlib

Generative AI

- LLMs, Transformers
- Prompt Engineering, RAG
- Agentic AI, LangChain

Backend

- Flask, FastAPI
- REST APIs
- SQL Databases

Frontend

- React (basics)
- HTML5, CSS3
- Streamlit UI

Tools & MLOps

- Docker, Git/GitHub
- AWS (EC2/S3), CI/CD
- Jupyter, Linux

EDUCATION

Bachelor of Science — Artificial Intelligence *Jun 2023 – May 2027 (Expected)*

Aror University, Sukkur, Pakistan

Relevant Coursework: Machine Learning • Deep Learning & Neural Networks • Computer Vision • NLP • Digital Image Processing • Data Structures & Algorithms • Database Systems

KEY PROJECTS

AutoML for Small Businesses *Sep 2025 – Dec 2025*

- Built a full AutoML tool letting non-technical users train and benchmark 5+ ML algorithms, cutting experimentation time by ~60%.
- Automated preprocessing and built dashboards tracking accuracy, precision, recall, and F1-score. Stack: Python, Scikit-Learn, Pandas.

Face Detection Attendance System *Jan 2025 – Apr 2025*

- Built a real-time computer vision attendance system with OpenCV at 30+ FPS, reducing manual logging time by ~80%.
- Designed a SQL backend for timestamped records enabling audit trails. Stack: Python, OpenCV, SQL, Tkinter.

STRENGTHS

Problem Solving

Skilled at breaking down complex problems into efficient, working solutions.

Fast, Eager Learner

Genuinely enjoys learning new tools and technologies, and is looking for a role that offers hands-on growth and mentorship.

CERTIFICATIONS

- Generative AI Application Developer — NCEAC-HEC Generative AI Training, Cohort 3 (2026)
- Machine Learning Internship Certificate — Elevvo Pathways (2025)
- Google UX Design — Foundations of User Experience Design & Human-Centered Thinking
- Data Analytics with AI — Data Analysis Techniques Powered by Artificial Intelligence Tools
